REUNIÓN INDUSTRIAL

The history of REI and the history of the manufacture of decorative fittings, furniture components and DIY accessories in Spain have run parallel to each other since 1986. Those histories converged when REI, by its very nature, began to lead the sector, incorporating continuous improvement processes and implementing a quality management system for the optimisation of the production process (ISO 9001 certified by SGS). Leadership is reinforced by integrating sustainability as a value present in materials and production processes, from design, prototyping, mould making, casting and metal turning, to packaging. REI applies a dynamic and integral discipline of sustainability to the entire production process; a recognised policy of environmental preservation that has allowed it, among other things, to obtain the demanding PEFC certification (Programme for the Endorsement of Forest Certification).

La historia de la fabricación de herrajes decorativos, complementos de mobiliario y accesorios DIY, en España y la de REI, transcurren en paralelo desde 1986 hasta que, por su propia naturaleza, REI, comienza a liderar el sector, incorporando procesos de mejora continua e implementando un sistema de gestión de la calidad para la optimización del proceso productivo (Norma ISO 9001 certificada por SGS). El liderazgo se consolida al integrar la sostenibilidad como un valor presente en materiales y procesos de producción, desde el diseño, el prototipado, la confección de moldes, la fundición y el torno de metal, hasta el envasado. REI aplica una disciplina dinámica e integral de sostenibilidad a todo el proceso productivo; una reconocida política de preservación medioambiental que le ha permitido, entre otras cosas, obtener la exigente certificación PEFC (Programme for the Endorsement of Forest Certification).

L'histoire de la fabrication de ferrures décoratives, de compléments de meubles et d'accessoires DIY en Espagne, et celle de REI, s'écrivent en parallèle depuis 1986 jusqu'à ce que, de manière intrinsèque, REI commence à être à la tête du secteur, en incorporant des processus d'amélioration continue et en mettant en place un système de gestion de la qualité pour l'optimisation du processus de production (Norme ISO 9001 certifiée par SGS). Le leadership est consolidé en intégrant la durabilité en tant que valeur actuelle dans les matériaux et les processus de production, depuis la conception, le prototypage, la fabrication de moules, la fusion et le tournage de métaux, jusqu'à l'emballage. REI applique une discipline dynamique et intégrale de durabilité à l'ensemble du processus de production ; une politique reconnue de préservation de l'environnement qui lui a permis, entre autres, d'obtenir l'exigente certification PEFC (Programme for the Endorsement of Forest Certification).
